PROFESSIONAL SUMMARY

Third-year B. Tech Computer Science and Engineering student building a foundation in programming, web development, and data analysis. Familiar with C and C++ and exploring practical software and AI tools through coursework and hands-on learning. Seeking an entry-level internship or project opportunity to apply analytical thinking, strengthen technical skills, and contribute to real-world solutions.

EDUCATION

Bachelor of Technology (B. Tech), Computer Science and Engineering

Eluru College Of Engineering & Technology | Eluru, Andhra Pradesh | [2024] – Expected [2028]
CGPA / Percentage: [Add if applicable]

TECHNICAL SKILLS

Programming: C, C++ (learning and practice)
Web Development: JavaScript, React, Node.js, Express.js (learning / academic practice)
Data & Tools: Excel, SQL, Python,
Concepts: Programming fundamentals, problem-solving, basic web application development

PROJECTS

AI-Generated Video: "The World in 2050"

Created an AI-generated concept video imagining how the world may look in 2050 as a creative exploration of generative AI tools and visual storytelling.

ChurnPredict360 – Customer Churn Prediction System

- Developed a machine learning project to predict customer churn and identify customers who may discontinue a company's products or services.
- Used Python, Pandas, and NumPy for data processing and analysis.
- Applied Scikit-learn machine learning techniques to build and evaluate a customer churn prediction model.
- Used Flask to develop a web interface for interacting with the prediction system.
- **Technologies:** Python, Pandas, NumPy, Scikit-learn, Machine Learning.

WORKSHOPS & TRAINING

Generative AI Workshop – CSE Department, Eluru College Of Engineering & Technology

C2C Tech Solutions Pvt. Ltd.

Participated in a college workshop covering AI and large language models, prompt writing, image generation, AI-based video and audio generation, song-lyrics creation, song generation, and introductory AI-agent concepts. Created an AI-generated video concept about the world in 2050.

Date: 14, 15, 16 in October 2026

Agentic AI Workshop & Hackathon

HITAM College, Hyderabad

- Participated in an Agentic AI workshop and hackathon focused on exploring AI technologies and practical applications.
- Gained exposure to AI agents and their potential to automate tasks and solve real-world problems.
- Participated in a hackathon environment to explore innovative ideas and technology-driven solutions.

Location: Hyderabad, Telangana, India

Date: 9,10 in October 2026

CERTIFICATIONS

Generative AI – ECET -Eluru, October -2026
Agentic AI – HITAM – Hyderabad, October-2026

RELEVANT STRENGTHS

Willingness to learn • Creative problem-solving • Interest in technology and AI • Team collaboration

CAREER INTERESTS

Software Development • Data Analysis • Web Development • Generative AI
